Subject: Genetically engineered food products.

Sensitivity: Personal

Please don't accept the word from lobbyists and campaign donors on this issue (or any other issue for that matter) when the results of you decisions affect my life and the lives of my family. Why isn't right to have full disclosure on genetically engineered foods when we have to have so much other information labeled on foods? All we want is freedom of choice. Isn't that a basic right?? What can it hurt? The pockets of your campaign donors? Please just let us make informed choice when we purchase our food. For this voter I would just grow my own instead if I can trust that know what I am buying. Please do not deny us this basic right... Thanks for reading this.
